News Briefs

The UCSF Community Health Education Program has appointed Linda Civitello-Brenner as its first full-time coordinator. Ms. Civitello-Brenner holds a B.S. degree in Public Administration from Antioch College/West and has had extensive experience in community programs relating to child development, to health care, and in coordinating volunteers. The Community Health Education Program sends teams of UCSF professionals each month to some 18 senior citizens centers and six youth programs, where they speak and answer questions on various health care topics such as cancer, arthritis, and nutrition. Cooperating groups are the S.F. Council of Churches, the UMCA, and the S.F. Community College District. Ms. Civitello-Brenner can be reached at 666-2325.

The Alcohol Information Center has a new coordinator, David C. Beglinger, who is replacing Tom Swanson. Mr. Beglinger has served as a volunteer with the Center for the past seven months. He is a graduate of Michigan State University, is presently a student at the S.F. Academy of Art, and is himself a recovered alcoholic. The Center which is for alcoholics, and also for people who have a significant relationship with alcoholics, is directed by the Community Services and Employee Relations Office of Hospitals and Clinics, and exists to serve the entire UCSF community. Appointments for counseling and referrals may be made by calling x3022.

Sadie Kaye was honored Thursday, October 28, on the occasion of her retirement after 28 years with the University. Nearly 200 friends, co-workers and well-wishers attended a buffet luncheon at University House. Malcolm S.M. Watts, Associate Dean of the School of Medicine and Director of Extended Programs in Medical Education, spoke first about her work in Extended Programs, and presented her with a gift. Her years of service in Djakarta as a member of the UC-Indonesian field service were recalled by John S. Wellington, now Professor of Pathology, who also presented a gift on behalf of the School of Medicine.

Miss Kaye initially came to the University as an aide to Seymour M. Farber (now Vice Chancellor for Public Programs and Continuing Education) in setting up the first cytology laboratory at SFGH. Since 1960 she has, as assistant to the director of the Extended Programs in Medical Education (formerly called Continuing Education in Health Sciences), been involved in the development of a number of creative courses for practicing physicians and other health professionals. Now in retirement, she is finishing a history of UCSF programs in postgraduate extended education.

A farewell reception is being held, Monday, November 15 in the Chancellor's House from 4 to 6 p.m. for June C. Abbey, Assistant Professor and acting chairperson of Biological Dysfunction, Department of Nursing. Ms. Abbey will leave the UCSF campus in December to become director of Physiological Nursing, College of Nursing, University of Utah, Salt Lake City. A UCSF staff member for the past 12 years, Ms. Abbey has participated in a number of physiological research projects, including an international study to develop a surgical boot to prevent clot formation in post-surgical patients.

The Committee to select recipients of the San Francisco Medal for presentation next Spring has been chosen, and is awaiting nominations from the campus and the community. Its membership is confidential. The single criteria is that the recipient will have made a major personal contribution to UCSF. If faculty members are nominated, they should have been emeritus for at least one year and no one selected should hold an administrative or policy making position in the University. All nominations must be received in the Chancellor's office no later than November 30, 1976.

An advanced technique for genetic engineering involving the alteration of the genetic constitution of living cells by the introduction of synthetic DNA has been developed by four UCSF researchers. The researchers, all members of the Department of Biochemistry and Biophysics, are Herbert Boyer, Professor, Biochemistry; Howard M. Goodman, Professor, Biochemistry and Biophysics; Herbert L. Heyneker, and Hohn Shine, both fellows. Their collaborators and co-authors are from the California Institute of Technology, Pasadena, and the City of Hope National Medical Center, Duarte, Ca. In a series of experiments completed in March and reported in the October 28 issue of *Nature*, the scientists describe how a synthetic gene element, which was an artificially created copy of *lac* operator DNA, was inserted into the live cells of a common laboratory bacterium (*Escherichia coli K-12*). Using a new technique for the formation of recombinant DNA, they then piggy-backed the synthetic material into the cells by attaching it to natural bacterial plasmid DNA. Once inside the cells, the recombinant DNA proceeded to replicate and function, thus altering the genetic constitution of the cells. This change resulted from the operation of the synthetic DNA, which facilitates the production of an enzyme called beta-galactosidase. The level of this enzyme increased 40-fold over that in cells without the recombinant DNA.

Chancellor Francis A. Sooy has been invited to visit the Republic of China by Dr. Y.S. Tsiang, Minister of Education. Dr. Sooy and his wife, Elizabeth, will be leaving November 28 for a two-week trip as guests of the government, returning December 4 via Hong Kong. Dr. Sooy will visit the University of Taiwan and participate in other educational activities.

SFGH Briefs

The Family Practice Residency Program at SFGH will present a course in "Compliance-Non Compliance" on Saturday, January 15, 1977, in the Carr Pathology Auditorium at SFGH. House staff are invited without fee and applications for enrollment are available through UCSF, 666-2483.

This is a half-day seminar dealing with specific issues in non-compliance (the failure of patients to follow the regimens and advice prescribed by their physicians) an important and difficult health care problem today.

The Leon Goldman Surgical Unit (3-D) in the new SFGH Medical Center was dedicated in a ceremony sponsored by the SFGH Department of Surgery on Oct. 20.

Dr. Goldman, a native San Franciscan, who died in March 1976, served with distinction as a former Chairman, UCSF Department of Surgery and as a former Chief of Surgery at SFGH, where he also completed his internship and residency following graduation from UCSF School of Medicine in 1930.

Among those present for the dedication of the bronze plaque in Dr. Goldman's memory were two of his three daughters: Mrs. Bertram (Dianne) Feinstein, Mrs. Bruce (Lynn) Kennedy, and their husbands. Also participating were J. Englebert Dunphy, immediate past Chairman, UCSF Department of Surgery; Carl Mollinson, who served as co-Chairman of Surgery at SFGH with Dr. Goldman; and F. William Blaisdell, present Chief of Surgery at SFGH.

The next issue of **Today/Tomorrow** will cover events for the **entire month** of December.
Deadline for copy will be 11 a.m. Thursday, Nov. 18. Send your copy to News Services, 1475 4th Ave., Attn.: Calendar.
